

CHARCOAL GAS INDU ACCESSORIES MARKE

To barbecue on charcoal means returning to the essence: food and a fire to grill upon. With barbecook® you can set your mind at ease, because you **always get a perfect grill result**. Why that is? Because we simply have **the best fire**. A fire that you can light with a few newspaper sheets and a natural air current. A fire that becomes very hot and this way makes a healthy combustion possible. A fire that you can easily control by yourself and which lets all noxious gases escape quickly. A perfect fire like this makes any lid redundant. And the **conviviality** of a visible fire? That's all included!

CTION ALL SEASONS TING SERVICE

Quickstart®

There are still certainties in life.

Choosing a QuickStart® charcoal barbecue means being absolutely certain. Certain of an **easy assembly** and a **grill-ready fire** in hardly fifteen minutes. Also certain of a **safe barbecue** that guarantees healthy grilling. But most of all certain that you bring home an **extremely qualitative barbecue**, which you will enjoy for years on end. So, rest assured, and trust our many years' craftsmanship.

Quickstart®

The difference is
in our eye for detail.

Grill-ready within 15 minutes with QuickStart®

Quickly clean again with QuickStop®

An eye for your comfort

Our charcoal barbecues are synonymous for **comfort from start to finish**, from assembly to maintenance. With the new enamelled windscreen and the firmer clips, our barbecues are **now even easier to assemble**. They are also **very easy to light** thanks to our unique QuickStart® system. Put three sheets of newspaper into the lighting pipe and your charcoal will be grill-ready after a mere fifteen minutes. With the **QuickStop® system** from barbecook® there's no endless cleaning work to be done afterwards either. Before you start grilling, pour some water via the pipe into the barbecue base. Afterwards, you brush the remaining ashes via the lighting pipe into the base, and you do away with everything without any risk.

Healthy and successful baking result thanks to the adjustable grid height

Safe, multifunctional handle

An eye for your health

Enjoying a delicious barbecue **without a care and in all safety**. That's all possible thanks to our **QuickStop® system**. Water in the base of your barbecue offers extra stability during grilling, and extinguishes the glowing charcoal in case the barbecue should fall over. The **practical handle** will also serve as an accessory holder and will protect against the heat of the bowl. What's more, with the adjustable grid you always make the most healthy and delicious grill dishes. Position the grid a bit higher or lower and you will always get the perfect grilling result, without the risk of food ever making contact with the unhealthy flare-ups.

High-quality stainless steel (inox)

Very qualitative enamel

Extremely solid cast iron

An eye for the highest quality

Choosing barbecook® means opting for quality that you will cherish your entire life. Our charcoal barbecues are made of **the finest materials**. The Ceram line is finished with **extremely qualitative, electrostatic enamel**, baked at 850°C. This results in a rust- and heat-resistant barbecue, which at the same time is very easy to clean. Our Inox barbecues are made of **high-standard stainless steel** of Japanese quality. This way, you are sure of a rust-resistant, unbreakable barbecue. Our Cast model has an **extremely solid cast iron bowl**, which allows you to also use your barbecue as a terrace hearth.
